DETAILED ACTION

1. Amendment received on 02/27/2009 has been entered into record. Claims 1, 7 and 12 are amended. Claims 5-6, 8-9, 23-24 and 27-28 are cancelled. Claims 1-4, 7, 10-22 and 25-26 are currently pending.
2. Amendment received on 03/12/2007 was entered into record. Claims 1, 12, 23-24 and 28 were amended.
3. Applicant's submission filed on 08/30/2006 was entered. Claims 1-2, 4-6, 8-9, 12-13, 15-17, 19-20 and 23-26 were amended. Claims 27-28 were new.
4. Amendment received on 03/03/2006 was entered. No claim was amended.

Priority

5. This application has no priority claim made. The filing date is 12/27/2001.

Reasons for Allowance

6. Claims 1-4, 7, 10-22 and 25-26 are allowed as per amendment received on 02/27/2009.

The following is an examiner's statement of reasons for allowance:

The closest prior arts of record issued to Emens et al. (US 6493744 B1), Durden et al. (US 20040250272 A1), Cragun et al. (US 5832212 A), Forsyth ("Identifying nude pictures" Forsyth, D.A., Fleck, M.M.) and PR Newswire (Worldlink Announces New Product for broadcasting audio and video) together fail to teach or suggest "a method for determining access to an electronic media object from one of a local or remote source, implemented by a device comprising a memory and a processor, comprising the steps of: analyzing with the processor at least one of audio and image information associated with said electronic media object for inappropriate content items by identifying stop words based on textual analysis or speech recognition analysis and by identifying nudity or sexually explicit images or other inappropriate imagery_ using image processing; preventing access to said electronic media object if said electronic media object contains an aggregate of inappropriate content items which is sufficient to exceed a known threshold of said inappropriate content items; wherein said analyzing further includes analyzing said electronic media object for appropriate content items; and allowing access to said electronic media object if said electronic media object contains at least one predefined appropriate content item said access allowed at least based on recognizing at least one person included in said predefined appropriate content, wherein the device prevents or allows access to said electronic media object for its presentation on an audio and/or visual display system" in combination with all the elements of each independent claim as presented by Applicant [See page 2 through page 5 of applicant's amended received 02/27/2009]. Applicant

argues that the prior art does not disclose or suggest the limitation combination of "preventing access to said electronic media object if said electronic media object contains an aggregate of inappropriate content items which is sufficient to exceed a known threshold of said inappropriate content items", "wherein said analyzing further includes analyzing said electronic media object for appropriate content items" and "allowing access to said electronic media object if said electronic media object contains at least one predefined appropriate content item said access allowed at least based on recognizing at least one person included in said predefined appropriate content". This argument is considered persuasive as per 3rd through 6th paragraphs on page 7 of applicant's amended received 02/27/2009.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
